## Experience

---

### Nurse (NYSC)

March 2021— Feb. 2022

#### Economic and Financial Crime Commission (EFCC) Headquarter, Abuja

Provided nursing care based on commission's guidelines. Inserted and removal of intravenous lines. Provided nebulizer therapy for patients with respiratory conditions. Attended to medical and surgical emergencies in adult/paediatric/neonate: Airways management e.g. using Ambu bag. ABCDE of emergency, fluid resuscitation and dressing. Assessed wound, wound care and removal of uncomplicated suture. Monitored and followed up on detainee treatment. Collaborated with investigating officers and Crime Record Officers (CROs) to ensure continuity of care. Followed Physician's prescriptions, and gave medicine following six rights of medication administration. Followed and assisted patients who are referred for advanced laboratory investigations in Non-EFCC facilities. Assessed the state of the cell. Served as a vaccinator and record officer of COVID-19 vaccine- using EMID and ODK apps- following National Primary Health Care Development Agency guidelines. Provided detainee patients education and discharge planning. Carried out other assigned responsibilities

### Nurse (Intern)

March 2020— Feb 2021

#### Federal Medical Centre, Birnin Kebbi

Nursing care and management of medical and surgical conditions in children and adults. Provided vaccination services to children, keep records and ensured mothers completed vaccinations for their children. Provided family planning service. In conjunction with senior nurses, ran ART and Tuberculosis clinic and made sure patients have their tests— from GeneXpert to CD4 counts— done. Also provided PMTCT service after the diagnosis have been confirmed. Provided Preoperative care: laboratory investigations, skin preparation, administration of enema preparation and teaching, transfer patients to operating theatre and from the recovery room. Post-operative care: positioning, ambulatory measuring of intake and output and pain management. Inserted indwelling catheter and maintained bladder irrigation. Provided IV management, oxygen administration, feeding (oral and enteral). Assessed wound, wound care and removal of uncomplicated suture. Assessed mother in labour for contraction, fetal heart rate, and vaginal examination and recorded them on partograph. Assessed newborn's Apgar score, weight, height, head and chest circumference. Assisted women with normal delivery. Counselling and support of patients' family.
