Summary

I am an energetic self-motivated individual with good analytical, leadership and communication skills. I am hardworking, a team player, highly creative and innovative; articulate and can work well under little or no supervision.

I am result oriented and solution focused these I achieve by combining ingenuity and integrity. I adapt quickly to the flow of new information and ideas in a multidisciplinary environment.

I like taking initiatives and researching new ways of doing things for personal and eventual professional enhancements for corporate value addition and economy, thus getting value for money spent on resources employed.

I look forward to working with a highly motivated institution that considers its people to be its most important assets and presents a challenging opportunity for the full utilization of my potentials and career development.
