

SUMMARY STATEMENT

I obtained my primary medical degree, bachelor of medicine, bachelor of surgery (MBBS) at the fastest growing university in Africa - Afe Babalola University. During my primary study, I graduated as one of the best students in my fold with a keen interest to learn as I strive for academic excellence. I have also gained certifications in ACLS, PALS, BLS and obtained full GMC Registration with a license to practice. I have been part of several leadership roles and that has shaped my skills to be sensitive to those whom I lead, moulding me as an all-round professional and individual. I am a motivated, passionate, friendly and polite physician. It is paramount to me that I put patients first in everything I do whilst providing safe, effective, and appropriate treatment and care. I am excited about deploying my medical knowledge and experience to address prevalent public health issues. I Possess research and analytical experience in areas including infectious diseases management, reproductive health, pharmaceutical supply chain operations and community-based health systems.

EDUCATION & RELEVANT ACTIVITIES

- Paediatrics Advanced Life Support – June, 2023
- Basic Life Support Certification – June 2023
- Blood Borne Pathogens Certification – June 2023
- Clinical communication and skills- by Samson clinical course – January, 2023.
- Trained by the Nigeria Centre for Disease Control on Covid 19 sample collection, and sampled for over 400 people Sept, 2020
- Acquired a course certificate from Stanford University on Covid-19 training for health care workers, the course was aimed to enlighten us on the both the pharmacological and medical interventions for the patients. (May, 2020)

PROFESSIONAL EXPERIENCE

Procure Hospital, Lifecamp, Abuja.

March 2021- Nov, 2023

Medical Officer

- Procure hospital Abuja, Nigeria is a hospital that offers primary and secondary medical services; it has 15 beds and 2 theatres. The main specialities offered here include internal medicine specialties, which includes cardiology, neurology, gastroenterology and endocrinology and the surgical department offers General surgery, emergency medicine, trauma and orthopaedics, and breast surgery.
- As a Resident Medical officer, I was responsible for 10-15 patients/day on average and worked more than 48 hours/week. I had at least 6(15hrs) "on call" duties/per month. I have had more than 4 years experience in general and acute medicine working in this hospital. i work under a couple of specialists/consultants including an endocrinologist, cardiologist, neurologist, gastroenterologist. i am familiar with the management of cases such as diabetes, thyroid diseases eg hypo and hyper thyroidism, hypertensive diseases, liver diseases eg hepatitis infections, kidney diseases and injury.
- I was responsible for taking patients' histories and performing relevant clinical examinations such as reading and interpreting observations, performing and reading ECG. I performed cardiac echo with the cardiologist on regular basis. I formulated differential diagnoses and was required to write a management plan and cross check it with my seniors. Prior to consultant's rounds, i would ensure the patient's investigations have been carried out and updates, ensure their medications are being delivered and as when due.
- During the general surgery posting, I am responsible for pre-operative assessment of the patients. Making sure that the patients are optimised for the surgery. I have also assisted in a number of surgical procedures such as appendectomies, herniorrhaphies etc.
- In the emergency departments, patients are triaged and taken into the treatment and resuscitation bay where they are resuscitated via the CAB adequately before they are transferred to appropriate wards; I have attended to and managed a wide variety of cases in adults, children and elderly including acute asthma attack, hypertensive/diabetic emergencies, acute bronchiolitis etc.
- I also had the role of cannulating patients, venepuncture, blood transfusion, NG Tube insertion, catheterisation etc. I also assisted my unit head in drawing up monthly rosters.
- I am also involved in teaching sessions, teaching a number of volunteer medical students during the summer on some practical skills such as history taking, cannulation, catheterisation etc.

Medical Officer

- National judicial council clinic is an institution that provides primary and semi secondary medical care and caters to about 30-50 patients per day.
- As a Medical Officer here, my role was to Assess all inpatients and outpatients. this includes; adequate and proper history taking and relevant examinations as well as proper documentation of all patient. It was my duty at the hospital to request investigations relative to suspected differentials and proper interpretation to come up with a correct diagnosis.
- It was my responsibility to use all the information gathered to come up with a working diagnosis and provisional management plan subject to review by the head of clinic duty.
- Moreso, I was involved in making adequate referrals after the initial assessment and resuscitation of patients to tertiary medical facilities for specialist care when needed.
- Furthermore, I was also entrusted with a leadership role as I was in charge of the medical team in the absence of the head of clinic duty and I used my leadership skills to ensure that work was done and carried out effectively.

Nnamdi Azikiwe University Teaching Hospital, Anambra State, Nigeria
Jan, 2020

Feb. 2019 –

Intern House Officer

- I did my internship at Nnamdi Azikiwe University teaching hospital, a large and renowned hospital with teaching and residency services in Anambra that serves a population of over 1 million people. It's a multispecialty hospital that cuts across various fields of medicine including Emergency Medicine, Internal Medicine, Surgery, Radiology, Obstetrics and Gynaecology, Paediatrics, Ophthalmology, Trauma and Orthopaedics, Accident and Emergency, Neurosurgery, Anesthesiology, Burns and Plastics, ENT, etc.
- I rotated through Surgery, Obstetrics, and Gynaecology, Internal Medicine and Paediatrics. I was also exposed to the emergency departments of these units while on call, participating actively in the treatment and care of patients.
- For my Paediatrics rotation, my responsibilities included focused and relevant history taking from paediatric patients, which was followed by practical procedures like sample collection, venipuncture, IV cannulation, lumbar puncture, exchange blood transfusion, phototherapy.
- I also rotated through the children's emergency where we managed emergency cases such as diabetic ketoacidosis, severe malaria, neonatal jaundice, sepsis from different focus etc and at the same time, engaging in emergency resuscitative procedures for dehydrated children who presented with severe shock.

- For my surgery rotation, I worked as the house surgeon in the general surgery department, then to the orthopedic surgery department and then finally in the urology. During call hours, I saw patients in the urology, general surgery, orthopedic, neurosurgery, pediatric surgery, oncological surgery, and ENT departments.
- I reviewed all in-patient admissions and presented cases during the morning ward rounds. I carried out post round orders and maintained patient files and records. I requested and followed up on patient investigations. When patients are discharged, I prepared discharge summaries and was responsible for performing bedside procedures like catheterization, NG tube passage, among many others.
- For my general medicine rotation, I worked in the respiratory and nephrology departments. On clinic days, I clerked new cases, followed up on old patients in the unit and reviewed their medications. I assessed the patients for complications and compliance with their medications. I reviewed lung function/spirometry reports and cross-checked my findings with my seniors. I also monitored the kidney function of my patients and reverted to my senior colleagues.
- In the emergency, we worked in teams which included a leader (consultant) and trainee residents. I had the opportunity to see a wide range of patients with medical illnesses. To name a few – Stroke, Meningitis, Pneumonia, Asthma, COPD exacerbation, Lung cancers, Upper GI Bleeding, Gout, Acute/chronic Renal failure, Electrolyte Imbalance, Poisoning, and overdose, other Infectious and Hematological diseases.
- I monitored acutely ill medical patients, which often required me to perform bedside procedures like blood glucose monitoring, urinalysis, ECG, and femoral taps. I regularly reviewed the drug charts, urine outputs and monitored their response to the medications administered. I also monitored the patients' observations and their vital signs.
- We had morning review of cases admitted every weekday and a grand round discussion of important cases with a general presentation of the surrounding topic every fortnight. We had weekly teaching sessions with the medical students. I taught the medical students in the unit frequently and we had departmental meetings often.
- For my Obstetrics and Gynaecology rotation, I was responsible for taking patients' histories and performing relevant clinical examinations for example, speculum/digital examinations, obstetric abdominal examinations. I formulated differential diagnoses and was required to write a management plan and crosscheck it with my seniors. I followed up with patients at the antenatal clinic and was involved in infertility management in the fertility clinic.
- Theatre-wise, I assisted senior obstetricians and gynaecologists in major procedures like myomectomy, hysterectomy, Ovarian cyst drainage and Caesarean sections. I also assisted in Endoscopic procedures like hysteroscopy, and laparoscopy while learning suturing techniques.

- Monitoring labour and assisting in deliveries were part of the duties within my scope. On several occasions, I detected and managed postpartum haemorrhages with the rest of the team.

LEADERSHIP & COMMUNITY SERVICE

Christian Medical and Dental Association, Chapter Mission Medical Outreach Oct. 2018

Are-Ekiti, Ekiti State and Ipere-Ekiti, Ekiti State

- Organised stakeholder engagement meetings involving traditional leaders focused on the provision of free medical services for the community
- Worked with the leadership team to organise free medical consultations sessions to rural communities

Afe Babalola University Medical Outreach Nov. 2017

Ido-Osi, Ekiti State

- Worked with community leaders to provide medical care and assistance at no cost to community residents with chronic diseases and illnesses
- Provided clothing, pharmaceutical drugs and hygiene amenities to participants of the medical outreach

ACADEMIC RESEARCH

‘The knowledge of and attitude towards the use of contraceptives and its determinants among women of reproductive stage in Ido-osi Local Government Area of Ekiti State Nigeria’

- Research assistant to medical faculty head, responsible for designing questionnaires that were administered to over 200 women and analysing results
- Research results informed the design of the Local Government’s outreach program to women to increase contraceptive use

TECHNICAL SKILLS

- Proficient with MS Excel, MS Word, MS PowerPoint
 - Experienced in conducting research and analysis in areas of health and public policy
-
