March 2022 – April 2023

CLINICAL NURSE

Defence Space Administration, Obasanjo Space Centre, Airport Road, Abuja-Nigeria

- Monitor vital signs, progress, and recovery of patients, promptly identifying any changes and taking appropriate actions to ensure their well-being.

- Prepare patients for physical examinations and treatment plans, ensuring they are fully informed and comfortable with the procedures.
- Safely administer scheduled medications and therapies through various routes, meticulously adhering to the rights of medication administration.
- Coordinate weekly blood pressure and blood glucose checks for staff, promoting their health and wellness within the organisation.
- Maintain an exceptional 96% positive patient score for compassion, fostering an environment of trust and empathy for patients.
- Demonstrate exemplary interpersonal relationship, teamwork, and leadership skills, motivating fellow healthcare professionals to deliver outstanding patient care.
- Provide specialised wound care, including debridement, to prevent infection and facilitate faster healing.
- Monitor and evaluate patients with medical conditions such as hypertension, first degree burn, respiratory condition, orthopaedic condition, first aid, and diabetes mellitus, employing a holistic approach to treatment to ensure optimal progress.
- Ensure accurate documentation, report writing, and record-keeping, contributing to seamless communication and continuity of care.
- Facilitate effective communication, both verbal and written, with patients, families, and the healthcare team, promoting collaboration and understanding.
- Educate patients on their treatment, nutritional regimens, and health needs based on underlying conditions, empowering them to actively participate in their recovery.
- Actively participate in the organisation and organisation of health programs and seminars, promoting health awareness and preventive measures

January 2021 – February 2022

NURSING OFFICER

University of Abuja Teaching Hospital, Gwagwalada, Abuja-Nigeria

- Conduct thorough patient assessments, employing critical thinking and clinical judgment to formulate accurate nursing diagnoses and individualised care plans.
- Provide exceptional bedside care, including NGT feeding, tracheostomy care, fluid chart monitoring, nebulisation, oxygen therapy, medication administration, catheterisation, venepuncture, and cannulation.
- Proficiently manage patients with pressure ulcers, diabetic foot ulcers, and removal of chest drains, implementing evidence-based interventions for improved outcomes.
- Establish and maintain positive rapport with patients and families through active listening, compassion, and empathetic communication.
- Employ aseptic non-touch technique (ANTT) during wound dressings, minimizing the risk of infection and promoting rapid healing.
- Prepare patients for surgery, following strict fasting procedures, and provide post-operative care to facilitate a smooth recovery process.
- Collaborate seamlessly with multidisciplinary teams, ensuring patient-centered care and comprehensive treatment plans.
- Serve as a scrub and circulating nurse in surgical cases, exhibiting meticulous attention to detail and adherence to safety protocols.
- Mentor and support student and junior nurses, fostering their confidence and competence in delivering exceptional patient care.
- Uphold patient trust and confidentiality, managing information with discretion in compliance with protection laws and professional ethics.
- Skillfully administer ECG examinations using a 12-lead ECG machine on patients with cardiac conditions, aiding in accurate diagnosis and treatment decisions.

- Adapt nursing practice to meet the challenges of high-pressure and demanding environments, maintaining composure and efficacy in critical situations.
- Display leadership and management skills by delegating duties and ensuring evidence-based practice.

July 2020 – December 2020
