Apo dutse, Abuja, Nigeria.

PROFILE

Dedicated and detail-oriented Medical Laboratory Scientist applying extensive theoretical knowledge and practical expertise in clinical testing, quality control, and laboratory management across multiple disciplines, including chemistry, hematology, and microbiology. Adept at implementing quality control standards, enhancing result accuracy, and contributing to a **10%** reduction in reporting errors and efficiently conducting phlebotomy, achieving a **20%** reduction in patient wait times.

EXPERIENCE

Medical Laboratory Manager
Queen's Hospital Apo, Abuja.

Nov 2022 - Date

- Implement and optimize laboratory procedures, resulting in a **20%** increase in overall efficiency.
- Ensure quality control measures, leading to a **20%** reduction in errors and ensuring the accuracy and reliability of laboratory results.
- Implement streamlined processes, reducing sample processing time by **45%**, resulting in quicker diagnostic turnaround for patient care.
- Take the lead in training fellow employees on good laboratory practices and protocols, contributing to a **30%** improvement in staff proficiency and adherence to industry standards.
- Develop and maintain rigorous quality assurance protocols to ensure compliance with industry regulations and uphold high standards.

Medical Laboratory Intern
Asokoro District Hospital, Abuja

Jan 2021 - Sep 2022

- Spearheaded the execution and analysis of tests in chemistry, hematology, and microbiology, achieving a **20%** reduction in result turnaround time through streamlined processes.
- Optimize specimen receiving and preparation procedures, resulting in a 15% increase in sample processing efficiency and accuracy.
- Enhance result review accuracy by **10%** and achieve **25%** fewer assay variations through improved quality control.
- Streamline blood drawing, reducing patient wait times by **20%** for a smoother, patient-friendly phlebotomy experience.

EDUCATION

B.sc, Medical Laboratory Science, Madonna University Nigeria, 2017.

SKILLS

- Phlebotomy
- Knowledge of principles, concepts and methodology sufficient to perform a broad range of tests in one or more areas of the clinical laboratory sections.
- Diverse cross-functional collaboration.
- Knowledge and skills to interpret the various clinical presentations of disease and apply such knowledge in conjunction with the Laboratory test findings to affect a timely and accurate diagnostic result.
- Effective communication with the ability to simplify technical findings to patients.
- Strong Micro skills required Responsible for ensuring timely performance of control validation and/or new lot reagent cross-over studies before consumption of current lot products.
- Knowledge and skills sufficient to provide technical instructions and advise other departments on Clinical laboratory procedures.

CERTIFICATION

NYSC Certification, 2023

Certificate of Internship, Asokoro District Hospital.

Managing Health and Safety in Healthcare, Alison(in-view).

Laboratory Management System(ISO/IEC 17025:2017), Alison (in-view)
