Dear, Sokoto State Advance Medical Diagnostic Centre

I hope this letter finds you well. I am writing to discuss the renewal of your web hosting for your website and the addition of email users to enhance your communication capabilities. We have been privileged to serve as your IT services provider, and we greatly appreciate your continued trust in our services.

As you may know, web hosting is essential for maintaining an online presence and ensuring the availability of your website to visitors. With your current web hosting. Which has expired on [**18th June 2023**], we highly recommend renewing your hosting services to ensure uninterrupted website access and a seamless user experience.

Additionally, we have noticed your growing need for email accounts associated with your domain name ([**ssamdc.com**]). Adding email users will enable you and your team to have professional and branded email addresses that align with your business identity. This will enhance communication efficiency and credibility.
