PROFILE SUMMARY

A professional radiographer with excellent communication skills demonstrated by substantial expertise in healthcare with proven knowledge of diagnostic imaging, Chest X-Ray, and operating digital radiology machines. My excellent experience, discipline, and work ethics are what organizations require for an efficient and seamless workspace.

SKILLS (TECHNICAL & SOFT SKILLS)

- Excellent verbal, written, interpersonal and customer service skills.
- Proven knowledge of Chest X-Ray, diagnostic imaging, and efficient handling of digital radiology machines.
- Proven ability to work unsupervised and as part of a multidisciplinary team.
- Proven ability to maintain radiation protection and patient safety.
- Good computer skills (Microsoft, Word, and Excel)
- Excellent communication and critical thinking
- Confident in working independently and highly team spirited.
- Good technical writing/documentation skills
- Ability to coordinate multiple tasks while maintaining attention to detail.
- Ability to maintain accuracy, detail, and confidentiality.

PROFESSIONAL EXPERIENCE

Radiographer

Garki Hospital, Abuja

June 2023 - Present

- Perform X-ray examinations and obtain good-quality X-ray images as requested by the referring physician.
- Perform procedures (which includes Hysterosalpingography (HSG), Intravenous urography (IVU), Barium Swallow, etc) as requested by the referring physician.
- Educate patients about procedures and respond to their questions and concerns.
- Apply proper radiographic techniques when taking the X-ray images by using proper exposure factors, proper collimation of the X-ray beam and proper lead shielding for my patients.
- Correctly enter patients data and ensure standard labelling of the radiographic images taken.

- Maintain patient safety by applying proper radiographic techniques and observe standard radiation protection rules and regulations.
- Knowledge and experience in radiology information systems and Picture Archiving and Communication Systems (PACS)
- Carry out Computerized Tomography (CT) scans.
- Participate in daily radiographic image quality review.
