CAREER OBJECTIVE

Detail-oriented professional with 3+ years of experience in the Mobile X-ray, C-arm and Digital X-ray. Interest in general x-rays, applying quality assessment in correct film labelling, exposure quality, identifying patient positioning, proper collimation and most importantly adequate inspiratory effort in chest x-rays in other to produce images of good diagnostic quality. Aiming to leverage my skills to successfully fill the Radiologic Technologist (Radiographer) role in your reputable international organization to grow and contribute immensely through integrity, diligence and continued self-development.

WORK EXPERIENCE

University Collage Hospital, Ibadan UCH
Radiographer

April 2023 – Till present

- Use radiation safety measures and protection devices to comply with government regulations and ensure safety of patients and staff.
- Record, process and maintain patient data or treatment records, and develop reports
- Participated in interventional radiology to aid physician to view and guide catheter through blood vessels to area of interest.
- Position and immobilization of patients on examination table
- Producing diagnostic radiographs in A & E, ICU Units using stationary and mobile x-ray machines.
- Provided assistance in the geriatric radiology Unit, and special babies care unit in changing seriously ill, elderly patient and disabled patient during the routine radiographic examinations.
- Collaborate with other medical team members, physicians and nurses, to conduct angiography and other special vascular procedure (retrograde urography procedure, micturating cystourethrogram, hysterosalpingography and intravenous urography).
- Demonstrated new equipment procedures or techniques to staff and provided technical assistance
- Ensured daily tube warming of the computed tomography machine/modality for maintenance and efficient performance of the modality
- Reporting of faults in modalities/machine when maintenance is due
- Collaborated with the radiology network system/team using the PACS and AMBRA software to store/record patient examination data and reports for efficient storage, retrieval and further research purposes.

Federal Medical Center Jabi
NYSC Radiographer

July 2022 – February 2023

- Supervised and carried out routine and special radiological examinations using digital x-rays with low repeat rate.
- Cleaned and kept the x-ray machine, diagnostic room and control panel area, neat and tidy.
- Produced good and clear images in record time for intervention, carrying out x-rays with the mobile x-ray in the accident and emergency unit.
- Performed in the operating room using the C-arm x-rays of the chest, upper and lower extremities etc.
- Adjust controls to set exposure time and distance, according to specification of examination.
- Prepared diagnostic room and set up for examinations.
- Part of the team that helped to run the reporting workstation using teleradiology for instant reporting.
- Responsible for updating the system software in the x-ray reporting workstation.
- Properly documented patient data into radiology information systems.
- Prepared and booked patients for special investigations.
- Explained in detail every procedure and addressed any question or concern of patient before the examination.
- Clearly instructed patients on how to change into examination gowns and removal of opaque objects or materials that affect images produced.
- Aided in dressing or changing seriously ill, injured or disabled patients before exam.
- Reported any fault or equipment malfunction during morning equipment warm up or at the end of the work day.
- Participated in weekly presentations and review meetings.
- Collaborated with other medical team members, such as physicians, nurses etc.
- Prepared and administered oral or injected contrast media to patients.

Mayfield Specialist Hospital
Radiographer

February 2022 – June 2022

- Position and immobilize patient on examination table.
- Produced good quality chest x-ray images.
- Screened for tuberculosis and other cardiovascular diseases using digital x-rays
- Screened for breast cancer for women using the mammography machine.
- Appropriated chest projections/techniques and additional views
- Adhered to radiation protection measures in conformity with the ALARA principle.
- Proper image identification and sending images to the radiologist for reporting and receive feedback.
- Operated fluoroscope to aid physician to view and guide wire or catheter through blood vessels to area of interest.
- Prepared statistical analysis with monitoring tools.

- Part of clinical audit team • Participated in review meetings.
- Quality Assurance and control of equipment
- Inspected main switch as a safety measure before and after every examination.

University of Calabar Teaching Hospital

December 2020 – January 2022

Intern Radiographer

- Strict adherence to the COVID -19 hospital guidelines.
- Performed routine and special radiological examinations under supervision.
- Cleaned and kept the x-ray machine, diagnostic room and control panel area, neat and tidy.
- Ensured morning warmup of the x-ray machine to ascertain if any fault before any exam.
- Responsibly adhered to standard radiation practice and safety.
- Ensure appropriate positioning and technically sound images of diagnostic quality produced.
- Patient identification, documentation and quality records.
- Documented data and quality records.
- Reported challenging cases to team leader.
- Seminar presentations.

KEY SKILLS

- Tele radiology: Use radiology work station “HEALTH IN A BOX” in transferring of images and reporting within the hospital.
- PACS: use several picture archiving systems for image documentation and retrieval such as DICOM, AGFA, HEDY SOPHOS DRF etc.
- Data Analysis: Use Microsoft excel to ascertain the percentage number of each examination carried out and patient turnout at the end of the month.
- Multitasking: Ability to manage high volume work flow within limited time.
- Health Management: patient and client focused attitude to provide the best care possible.
- Communication: Excellent written and spoken English.
- ICT: Proficiency in Microsoft applications, MS word, excel and power point.
- Detail and accuracy: Innovative and very careful to pay attention to details.
- Produce chest x-rays of optimal images for reporting on time.

EDUCATION

- **PG. Computed Tomography** Nigerian Institute of Radiographers
- **BSc. Medical Radiography** University of Nigeria, Nsukka
- **WASSCE** Federal Government Girls College Calabar
- **FSLC** Calabar Preparatory International School, Nigeria
